Mi40

Economical and reliable trip logging system

- ✓ Budget trip logging system
- ✓ 100% conclusive, reliable and realtime visibly in the app and online platform
- ✓ Dutch quality mark for trip logging systems
- ✓ Mileage reading reports

With our trip logging system, the Mi40, the manual recording of your trip administration finally becomes a thing of the past. The system is professionally installed by an installation specialist after purchase. After installation and activation all your kilometres driven are automatically recorded in real-time.

100% conclusive & reliable

With the Mi40 you are assured of fully automatic trip logging. All details of each driven route, both for business and private purposes, are automatically registered for you.

Realtime knowledge

All information about every route can be seen online and in the app. Examples include route information such as travelling time, distance, departure and visiting address, post code and house numbers, always realtime and up-to-date.

Online platform & app

With the MiApp and the online Moving Intelligence platform you have one summary of all your vehicles, always and everywhere. All current information such as engine ignition on/off, current speed and driven distance are displayed on a detailed chart and in a table summary. Live tracking is active across the whole world. The MiApp is available for iOS and Android.

Simplicity and user-friendly

The Mi40 is extremely compact in size, and is installed invisibly and tested professionally by your dealer or installation specialist. The system has no influence on the vehicle's electronic systems. After installation you will receive an activation code. This adds the vehicle to your account, and you activate the desired package. The chosen package is active immediately, throughout the whole of Europe, at the same rate. On the Moving Intelligence platform you manage the administrative details, the vehicle(s) and the authorisation structure.

MOVING INTELLIGENCE

Reports

With the Mi40 you can record much more than just mileage administration. The online Moving Intelligence platform enables a real-time view of the current status of your whole vehicle fleet.

With mileage reading reports you then always have a summary of all mileage readings of your vehicle fleet.

Geofencing & Lock Position

Geofencing is the virtual demarcation of a certain location. With Lock position it is possible to receive an once-only notification by email and in the app as soon as your vehicle starts to move.

As soon as a vehicle arrives outside or inside a pre-set area, you automatically receive a message by email or a push notification on your smartphone or tablet.

Trip logging quality mark

Our trip logging systems, the Mi40 and the Mi50, have the Dutch trip logging systems quality mark (Keurmerk RitRegistratieSystemen). Users of our trip logging systems can then be sure of 100 per cent conclusive, reliable and tax authority-proof trip registration. With this quality mark the correctness of your trip administration for the tax authorities is guaranteed and you can count on secure use of privacy and fraud-sensitive data.

Mi40 ADVANTAGES

- Professionally fitted by an installation specialist
- Back-up battery
- Live Tracking
- Economical trip logging system
- Managed with MiApp (iOS and Android)

MOVING INTELLIGENCE

We bring your world on the move under control. This is done with hardware that is invisibly built-in and with software that makes information visible. We help people manage all things moving: from car to scooter, from trailer to container, from boat to work equipment. We do this for everyone: multinational or retailer, fleet manager or proud owner of a vintage car.
